-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/26/05 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1, 3, 4, 6 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

3. Claim 8 is objected to because of the following informalities: there is no antecedent basis for the term "edge of said impermeable body". Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1772

5. Claims 1, 3, 4, 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over the European patent document in view of Brayden et al or Heier. The primary reference discloses the invention substantially as claimed, namely a sandwich panel comprising a honeycomb core with walls that extend laterally between first and second panels surfaces, a plastic barrier layer surrounding the core and adhesively attached to the core, and first and second skins attached to the barrier layer; see page 3, lines 8-30. However the reference does not teach a permeable core. The secondary references teach the desirability of perforating a honeycomb core in a sandwich panel; see column 2, lines 9-32 of Brayden et al, and column 1, lines 13-28 and column 2, lines 29-35 of Heier. It would have been obvious to one of ordinary skill in the art to perforate the honeycomb core in the article of the primary reference in view of the teachings in the secondary reference in order to minimize out-gassing or emissions of volatile gases and prevent core collapse during laminating. Concerning claim 8, Figure 3 of the primary reference shows skins 4 extending past the edge of the body of the panel.
